Marine Mammal Monday: Marine Mammal Sounds Activity Guide

1. What are the three most common patients at The Marine Mammal Center?

2. Why do elephant seals vocalize? Match the age class with their purpose for vocalizing.
   - Pups: Establish dominance
   - Weaners: Let mothers know they are hungry
   - Adult Female: Communicate with other weaners on the beach
   - Adult Male: Find pup in crowded rookery

3. How much should a healthy 1-month-old elephant seal weigh?

4. Across
   2. The second marine mammal highlighted.
   5. A distinctive and learned vocalization unique to individual dolphins.

Down
   1. Used by toothed whales to detect objects in their environment, similar to sonar.
   3. Group of whales and dolphins that echolocate (toothed whales).

6. How can you help? Draw one way you can become an ocean hero!
