

The Marine Mammal Center®

The Marine Mammal Center advances ocean health through marine mammal rescue and rehabilitation, research, and education.

Stewardship Saturday: Investigating Tidepools for Ocean Health

Thank you for joining us at May's Stewardship Saturday event in collaboration with The Marine Mammal Center, Greater Farallones Association, and Latino Outdoors.

The Marine Mammal Center uses the ["What, So What, Now What" framework](#) to link its efforts to broader issues of ocean health and climate change. We've applied this framework to reflect on and highlight key takeaways from our recent event.

What?

What value do tidepools have for our coastal ecosystems and marine mammals?

So What?

Through our partnership with Greater Farallones Association, The Marine Mammal Center, and Latino Outdoors, we deepened our understanding of how tidepools support marine life and humans. These organizations shared the importance of exploring tidepools responsibly, observing wildlife safely, marine life that rely on tidepools, and ways we can support this interconnected ecosystem.

Now What?

You can help protect coastal habitats by reporting sick or injured marine mammals to The Marine Mammal Center, joining or supporting community-based outdoor education through groups like Latino Outdoors, or volunteering or participating in programs offered by Greater Farallones Association and The Marine Mammal Center.

During this event, the following next-step ideas were shared, and we've provided resources to help you explore these topics in more depth.

Greater Farallones Association	Latino Outdoors	The Marine Mammal Center	Tidepooling
Fellowships Upcoming Events Volunteer	Outings and Events	Report a Sick or Injured Marine Mammal Volunteer	Safe Tidepooling Tips
